

Package ‘entcn’

January 15, 2022

Type Package

Title Translate English Words into Chinese Words

Version 1.0.0

Maintainer Xinyuan Chu <chuxinyuan@outlook.com>

Date 2022-01-12 15:46:13 UTC

Description If translate English words into Chinese, you might consider looking up a dictionary or online query, in fact, there is a faster way for R user. Ke-Hao Wu (2014) <RYoudaoTranslate: R package provide functions to translate English words into Chinese.> provides interface to Youdao translation open API for R user. But this software is not very friendly to use, I have made some improvements on the basis of this software. You can pass in a words or a vector consisting of multiple words, which will return the corresponding type of Chinese representation and be easy to reuse.
