

Genentech Biostatistics Summer Internship 2014 Program

Organization Name: Genentech, Inc.

Location: South San Francisco, CA.

Number of Positions: 4-6

Type of Student (e.g., graduate, PhD): Graduate, pursuing PhD in Statistics, Biostatistics, or related field.

Deadline for Applying: January 26, 2014 but offers may be made earlier.

Brief Description of Work:

Genentech is a leading biotechnology company that discovers, develops, manufactures and commercializes biotherapeutics for patients with significant unmet medical needs. For more information on Genentech, see www.gene.com. Our biostatistics summer interns work for 10-12 weeks under the supervision of experienced biostatisticians on theoretical or applied problems with direct relevance to on-going clinical or non-clinical drug-development research in the diverse therapeutic areas including oncology, immunology, ophthalmology, and virology. The specific topics range from problems in genomics and, more generally, translational research to late stage clinical trials and post-marketing evaluations. At the end of his/her internship, each student gives a department-wide presentation on their research topic. It is not uncommon for an intern to summarize their work in a peer-reviewed publication.

Other Relevant Information:

Applicants must be at least 18 years old and must be current graduate students pursuing a PhD degree in statistics or biostatistics who have completed at least one year of graduate work by May 2014 and who will be returning to school in the fall of 2014. The applicant must be legally authorized to work in the US. In addition, applicants should have a good working knowledge of R, S-Plus or SAS and have good communication skills.

Name and Address of Person to Contact:

E-Mail: Please send CV, personal statement of interest and a letter of recommendation to gnebiostatsummerintern@gene.com
